JRF ORTHO PRODUCTS

OSTEOCHONDRAL ALLOGRAFTS

Osteochondral allografts (OCA) allow surgeons to transplant mature hyaline cartilage with viable chondrocytes and subchondral bone in an intact unit.

Readily available Precut Fresh OCA Cores are the optimal solution for small, focal osteochondral defects.

PRESUTURED STERILE TENDONS

JRF Ortho exclusively offers a number of presutured tendons, which are sterile and preassembled with Arthrex® sutures for speed and convenience.

NONSUTURED STERILE TENDONS

An excellent option for ligament reconstruction procedures, JRF Ortho provides surgeons a wide array of nonsutured sterile tendons for their needs.

NONSUTURED ASEPTIC TENDONS

For the surgeon who wants non-irradiated tendon allografts, these tendons are aseptically handled throughout the process, never exposed to irradiation. The unique part code make certain of what product you are getting.

MENISCUS

Meniscal transplantation is a surgical technique designed to restore the biomechanics of a meniscus deficient knee. Meniscal allograft transplantation provides improvement regarding pain and level of function for daily activities.
